

The International Conference on ICZM and MSP integration is organized within the Shape (Shaping an Holistic Approach to Protect the Adriatic Environment between coast and sea) project funded by the European Union through the Adriatic IPA Cross Border Cooperation 2007-2013. Shape aims at the development of a multilevel and cross-sector governance system, based on an holistic approach and on an integrated management of the natural resources, risk's prevention and conflicts resolution among uses and users of the Adriatic coast and sea. Project activities promote the application and the successful implementation of the Integrated Coastal Zone Management Protocol in the Mediterranean and the Roadmap for Maritime Spatial Planning in the Adriatic region (<http://www.shape-ipa-project.eu/>).

Within this context, the international conference constitutes an opportunity to share experiences and best practices on ICZM and MSP implementation at the scale of European marine region and sub-region. The workshop will give particular attention to the integration between MPS and ICZM, as well as to their interrelation with other European policies and directives (e.g. MSFD, WFD, Habitat Directive, etc.) that are highly relevant for the sustainable planning and management of the coastal and marine systems.

Moreover, the conference aims to promote a wide discussion among experts, Adriatic Sea's stakeholders and Shape partners on ICZM-MSP implementation in the Adriatic Sea, providing the arena for a wide discussion on main obstacles, constraints, needs, opportunities and priorities. In this perspective, the conference will represent an initial step for the development of a common methodology and related guidelines for MSP application in the Adriatic Sea. To respond to these objectives the conference is structured in five technical plenary sessions:

- **Session 1**
“MSP and ICZM international experiences: Europe and Marine Regions”
- **Session 2**
“MSP and ICZM international experiences: sub-regional scale”
- **Session 3**
“MSP in the Adriatic Sea”
- **Session 4**
“MSP in the Adriatic Sea - Stakeholders roundtable”
- **Session 5**
“MSP and ICZM in Veneto: opportunities and conflicts”

The conference is open to any participant who might be interested to contribute to the evolving process of MSP implementation in the Adriatic Sea and its integration with ICZM policies, programs and tools.
